Courage, Culture & Interpersonal Intervention: Practical, Evidence-Based Strategies for Injury Prevention Behavioral/Behavior-Based Safety

by E. Scott Geller

This article reviews practical applications of seven interventions that target safety-related behaviors. It attempts to answer the question: What does it take for more people to become interpersonal change agents for occupational safety and health?

Promoting Behavior Change: Self-Monitoring as an Intervention Among Computer Users
ASSE Foundation Research

by Nicole Gravina, Yueng-Hsiang Huang, Michelle M. Robertson, Michael F. Blair and John Austin

The peer observation component of a behavior-based safety process can limit its application in certain settings—such as people who work alone or in settings where they cannot leave the work area. Self-monitoring is an approach that can be used to address this limitation. This article presents the results of a study of the application of this technique with a group of computer users.

by E. Scott Geller

Safety 7

ADD

Great leaders bring out the best in people by showing them the intrinsic consequences of their work, thus inspiring them to be self-accountable. To do this, they demonstrate humility, acknowledge the contributions of others, accept personal responsibility for failure, promote a learning culture, demonstrate optimistic seeking, make rigorous and discriminating personal decisions and encourage self-motivation. This article is based on these principles and offers some practical ways to bring them to life.
